SILKSCREEN GUIDELINES

Our screen printing process offers a durable design on a product that will be seen by countless people – at the stadium, on the trail, or on the beach. Your one color logo or art will be centered on our chair back approximately two inches below the Crazy Creek logo (2" x 3").

We use white ink (other colors available upon request). The screen printing process we use has been carefully chosen to ensure a high quality result with no damage to the chair. Since fabrics we are coated for waterproofing and would be damaged by heat, we use an oil-based ink that is air dried rather than heat treated. Due to the ink and air dry process, fine details do not print legibly. Intricate details clog the screen and consequently, do not print.

The most successful prints are of simple design with bold lines.
